Subject : Public Engagement on Long-term Decarbonisation Strategy

Dear Sirs,

I object to the idea of Regional Cooperation proposed under the Public Engagement Document because:

1) Hong Kong has always been able to supply its own electricity. This so-called cooperation is clearly a political move and a surrender, or a large discount, of Hong Kong Electric's and CLP's autonomy.

2) Nuclear energy is unsafe. There are other and much safer alternatives such as natural gas and solar power.

Thank you,

Alice Fong, a concerned citizen

I object to the idea of Regional Cooperation proposed under the Public Engagement Document because:

- 1) Hong Kong has always been able to supply its own electricity. This so-called cooperation is clearly a political move and a surrender, or a large discount, of Hong Kong Electric's and CLP's autonomy.
- 2) Nuclear energy is unsafe. There are other and much safer alternatives such as natural gas and solar power.

Thank you,

Miss Li, a concerned citizen
